WORK EXPERIENCE

Elixirr Digital d.o.o.

Rijeka, Croatia

Data Engineer

Feb 2022 - Present

- **Snowflake Scripting & JSON:** Developed complex **Snowflake Stored Procedures** utilizing conditional logic and SQL scripting to dynamically transform relational records into hierarchical **JSON structures** for real-time API payloads.
- **Architecture Evaluation:** Conducted a technical Proof of Concept (POC) on **Snowflake Streams and Tasks**, evaluating native **Change Data Capture (CDC)** capabilities as a potential alternative to IICS schedulers.
- **ELT Architecture:** Designed optimized **Snowflake Views** for the Supplier 360 domain, pushing transformation logic to the database layer to efficiently serve pre-aggregated data to downstream export processes.
- **Modernization & Migration:** Spearheaded the migration of 16 legacy Informatica PowerCenter workflows to **IICS (Intelligent Cloud Services)**, re-architecting the logic to utilize **File Listeners** for an event-driven, low-latency architecture.
- **Technical Leadership:** Served as the Technical Lead for the CLM-HCE project (iCertis/MDM integration), gathering requirements from cross-functional teams and delivering **5 complex integrations** despite initially ambiguous business logic.
- **Schema Governance:** Orchestrated the **Schema Validation** process for Snowflake objects, reviewing and approving DDL changes made by external MDM teams to ensure compatibility with downstream ingestion pipelines.
- **Hybrid ETL/API Design:** Engineered a hybrid pipeline using **IICS CAI (Cloud Application Integration)** and CDI to synchronize user data between internal Oracle databases and external Risk Management platforms (ProcessUnity/OneTrust).
- **Scalable Ingestion:** Developed a high-volume ingestion framework orchestrating **30 parallel CDI mappings** within a single Taskflow, automating the extraction and loading of disparate CSV datasets for risk reporting.
- **Security & Compliance:** Implemented a secure data exchange pipeline that converts JSON streams to CSV and applies **PGP encryption** before delivery to third-party vendors (Visier), ensuring strict data privacy compliance.
- **Performance Optimization:** Refactored complex legacy Oracle PL/SQL procedures to accommodate 100+ new data attributes, achieving a rapid deployment cycle with zero production defects.
- **Complex File Handling:** Designed logic to parse and generate **Fixed-Width** and special-character files for financial integrations (Fidelity), ensuring 100% data accuracy across banking interfaces.
- **Mentorship:** Acted as a Subject Matter Expert (SME) for the offshore support team (Cognizant), conducting knowledge transfer sessions and documenting runbooks to reduce escalation time for production issues.

Support Engineer

Sep 2020 - Jan 2022

- **Cloud Data Operations:** Managed serverless ETL pipelines using **AWS Glue** and **Amazon Athena**, utilizing **AWS CloudWatch** logs and metrics for root cause analysis to resolve failures and ensure data integrity.
- **Data Warehousing & Ingestion:** Executed complex data loading operations into **Amazon Redshift** using COPY and UNLOAD commands to manually resolve production failures caused by schema mismatches and special character encoding.
- **Streaming Infrastructure:** Monitored **AWS Kinesis Firehose** streams, performing manual scaling operations (adding shards) during traffic spikes to prevent data loss and ingestion lag.
- **Production Data Remediation:** Executed ad-hoc SQL patches (UPDATE/DELETE) to correct production data errors, ensuring data safety by creating temporary backup tables prior to execution.
- **ETL Development (SDLC):** Progressed from support to development by designing, building, and testing two end-to-end **Talend** integration jobs, adhering to the full Software Development Life Cycle (SDLC).
- **Incident Management:** Responded to Severity-1 production incidents via **PagerDuty**, consistently meeting a strict 4-hour Service Level Agreement (SLA) for critical data availability issues.
- **Server Administration:** Utilized **SSH** to access EC2 instances for system maintenance, log retrieval, and manual script execution to resolve application hangs.
- **Resource Optimization:** Proactively monitored compute resources, identifying and terminating runaway queries or long-running jobs to optimize cloud costs and maintain system performance.

- **Data Compliance:** Executed **CCPA (Privacy)** workflows, identifying and processing sensitive user data deletion requests across systems to ensure regulatory compliance.
- **Operational Standardization:** took ownership of the "Shift Handover" process during tenure as Support Engineer, standardizing incident reporting protocols and runbooks to improve communication between night and day shift teams.

CERTIFICATION

Certificate: **AWS Certified Cloud Practitioner** | Amazon Web Services (*Issued Dec 2024*)
Credential ID: 37d93dbf77f14edea3265d29bd2beaa7

EDUCATION

University of Rijeka, Department of Informatics	Rijeka, Croatia
<i>Master's Degree in Informatics</i>	<i>Graduation Date: Jul 2021</i>
<i>Bachelor's Degree in Informatics</i>	<i>Graduation Date: Sep 2019</i>

SKILLS & INTERESTS

Skills: • **Cloud Data Warehousing:** **Snowflake** (Snowpipe, Streams & Tasks, Stored Procedures, Time Travel, Zero-Copy Cloning, Stages), **Amazon Redshift**, **Oracle Database**.

- **ETL & Integration:** **Informatica Intelligent Cloud Services (IICS)** (CDI, CAI, Taskflows), Informatica PowerCenter, **AWS Glue**, Talend, Apache Airflow.
- **AWS Ecosystem:** S3, Athena, Kinesis Firehose, EC2, CloudWatch, IAM.
- **Languages & Scripting:** **Advanced SQL** (Window Functions, CTEs, PL/SQL), **Python** (Scripting, Data Parsing), Unix/Linux Shell Scripting.
- **DevOps & Tools:** Git (Version Control), Jira, ServiceNow/HappyFox, PagerDuty, Postman (API Testing).

Interests: • **Technology & Automation:** Passionate about **IoT and Home Automation**, with a keen interest in modern automotive technology and smart systems integration.

- **Active Lifestyle:** Avid hiker and traveler, regularly exploring nature trails and seeking new cultural experiences.
- **Strategic Gaming:** Enjoy strategy and logic-based gaming, focusing on resource management and problem-solving.

LANGUAGE SKILLS

Mother tongue(s): Croatian

Other language(s): English (C1), Italian (A2)
